**What is this product?****Type**

This Fund is an open-ended investment company with variable capital which was incorporated in Ireland on 12 March 2013 under registration number 525004 and is authorised by the Central Bank as a UCITS.

**Term**

The Company is an open-ended public limited company incorporated for an unlimited period. However, it may be dissolved at any time by a resolution passed at a general meeting of Shareholders adopted in compliance with applicable laws.

This Fund has no maturity date. However, it may be terminated and liquidated by the decision of the Board under specific conditions set forth in the Prospectus.

**Objectives**

**Investment objective** The objective of the Fund is to track the equity market performance of developed and emerging markets.

The Fund seeks to track the performance of the Morningstar Exponential Technologies Index (the "Index") as closely as possible.

The Fund is an index tracking fund (also known as a passively managed fund).

**Investment policies** The Fund invests primarily in securities included in the Index. The Index measures the performance of global companies that are well positioned to benefit from the growth of innovative technologies (as determined by the Index Provider). Those companies can be large, mid or small cap from both developed and emerging markets. The Index is equal weighted and targets up to 200 securities. Securities are selected based on liquidity, size, and exposure to innovative technologies. The Index can have more or fewer than the targeted number of securities due to securities falling short of the selection and eligibility criteria, or as a result of corporate actions after reconstitution of the Index. The Index is rebalanced and reconstituted annually in accordance with the Index Rebalance Frequency. Index constituents may on occasion be rebalanced more often than the Index Rebalance Frequency, if required by the Index methodology, including for example where corporate actions such as mergers or acquisitions affect components of the Index.

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest using the optimisation strategy as further described in the "Investment Objectives and Policies – Index Tracking Funds" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus.

The Investment Manager and/or Sub-Investment Manager also may, in exceptional circumstances, invest in securities not included in the Index but that it believes closely reflect the risk and distribution characteristics of securities of the Index. The equity securities in which the Fund invests will be primarily listed or traded on Recognised Markets in accordance with the limits set out in the UCITS Regulations.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Save in exceptional circumstances, the Fund will generally only issue and redeem shares to certain institutional investors. However, shares of the Fund may be purchased or sold through brokers on one or more stock exchanges. The Fund trades on these stock exchanges at market prices which may fluctuate throughout the day. Market prices may be greater or less than the daily net asset value of the Fund.

The Fund's maximum exposure to securities lending as a percentage of its Net Asset Value will not exceed 40%.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on [www.ssga.com](http://www.ssga.com)); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Shares of the USD Class are issued in U.S. Dollar.
