Past performance is not a guarantee of future results.

Investing involves risk including the risk of loss of capital.

Performance returns for periods of less than one year are not annualised.

Returns are gross of fees (based on unit price) and net of irrecoverable withholding tax.

The index returns are unmanaged and do not reflect the deduction of any fees or expenses. The index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income. The performance includes the reinvestment of dividends and other corporate earnings and is calculated in GBP. The calculation method for value added returns may show rounding differences.

When the Fund is closed according to its official Net Asset Value (NAV) calendar but, nonetheless, a significant portion of the underlying security prices can be determined, a Technical NAV is calculated. Past Performance indicated herein has therefore been calculated using a Technical NAV when required, as well as the official NAV of the Fund as at each other business day for the relevant period.

Any spreads disclosed are indicative only and are subject to the discretion of the investment manager, based on market conditions at the time of transaction.

Please note that the Q1 2024 factsheet included NAV as of 28th March, instead 29th March. All other data was correct. Please contact your Relationship Manager should you require further details.

Glossary:

Price/Earnings Ratio FY1

The average of the price of each underlying security divided by the mean EPS estimate of the security for the next unreported fiscal year, as of the report date.

Average Price/Book

The average of the price of each underlying security divided by the Book value per share of the security, as of the report date.

Index Dividend Yield

The average of the Annual dividends per share (DPS) of each underlying security in the index as of the report date divided by the price of the security as of the report date.

TER

Total Expense Ratio is a fee charged to the fund, as a percentage of the Net Asset Value, to cover costs associated with operation and management of the portfolio of assets.

R-Factor™ Summary

R-Factor™ is built off a transparent scoring methodology that leverages the Sustainability Accounting Standards Board (SASB) Materiality Map, corporate governance codes, and inputs from four best-in-class ESG data providers.

R-Factor supports the development of sustainable capital markets by giving investors the ability to invest in solutions that integrate financially material ESG data while incentivizing companies to improve their ESG practices and disclosure in areas that matter.

Climate Metrics

Climate Metrics	Fund
Carbon Intensity (Direct + Indirect)	189.58
Weighted Average Carbon Intensity (Direct + Indirect)	79.47
Total Reserves Carbon Emissions	13.84
Scope 1 + 2 Carbon Emissions	3494750.68
TCFD Total Carbon Emissions**	50,170.08*
TCFD Carbon Footprint	22.55
TCFD Carbon Intensity	61.57
TCFD Weighted Average Carbon Intensity (WACI)	44.77
Brown Revenue %	1.32
Green Revenue %	3.90

See "Glossary" for detailed calculation notes such as missing data treatment, data lag and exclusions. Source: State Street Global Advisors, S&P Trucost, FactSet, Task Force on Climate-related Financial Disclosures (TCFD). The results are estimates based on assumptions and analysis made by State Street Global Advisors. They are not intended to represent actual results of any offering. Actual results may differ. * The TCFD Total Carbon Emission metric allocates emissions to investors based on an equity ownership approach. In the case of commingled funds, the results represent the environmental responsibility of the entire fund's assets under management. For individual unitholder's responsibility, an apportioned responsibility can be calculated based on the individual holding percentage. ** The metric is not used to compare portfolios and benchmarks because the data is not normalised.

Stewardship Profile

As of 30 Jun 2024

Stewardship Profile

Q1 2024

Number of Meetings Voted	152
Number of Countries	20
Management Proposals	2,218
Votes "For"	91.70%
Votes "Against"	8.30%
Shareholder Proposals	62
With Management	82.26%
Against Management	17.74%

Figures are based on State Street Global Advisors' general approach to voting at the companies held by the Fund at quarter end. This information is not a substitute for a proxy voting report, which can be requested through your relationship manager. State Street Global Advisors' (SSGA) asset stewardship program is aimed at engaging with our fund companies on issues that impact long-term value creation across environmental, social and governance (ESG) considerations. In the recent past, SSGA has issued extensive guidance on key governance matters such as effective, independent board leadership. SSGA's current focus is on helping boards think about the possible impacts of environmental and social issues and incorporating a sustainability lens into boards' oversight of long-term strategy as a sound business practice.

R-Factor™

R-Factor™ is an ESG scoring system that leverages commonly accepted materiality frameworks to generate a unique ESG score for listed companies. The score is powered by ESG data from four different providers in an effort to improve overall coverage and remove biases inherent in existing scoring methodologies. R-Factor™ is designed to put companies in the driver's seat to help create sustainable markets.

R-Factor™ Scores are comparable across industries. The ESG and Corporate Governance (CorpGov) scores are designed to be based on issues that are material to a company's industry and regulatory region. A uniform grading scale allows for interpretation of the final company level score to allow for comparison across companies.

The R-Factor™ scoring process comprises two underlying components. The first component is based on the framework published by the Sustainability Accounting Standards Board ("SASB"), which is used for all ESG aspects of the score other than those relating to corporate governance issues. The SASB framework attempts to identify ESG risks that are financially material to the issuer based on its industry classification. This component of the R-Factor™ score is determined using only those metrics from the ESG data providers that specifically address ESG risks identified by the SASB framework as being financially material to the issuer based on its industry classification.

The second component of the score, the CorpGov score, is generated using region-specific corporate governance codes developed by investors or regulators. The governance codes describe minimum corporate governance expectations of a particular region and typically address topics such as shareholder rights, board independence and executive compensation. This component of the R-Factor™ uses data provided by ISS Governance to assign a governance score to issuers according to these governance codes.

Responsible-Factor (R Factor) scoring is designed by State Street to reflect certain ESG characteristics and does not represent investment performance. Results generated out of the scoring model is based on sustainability and corporate governance dimensions of a scored entity.

The returns on a portfolio of securities which exclude companies that do not meet the portfolio's specified ESG criteria may trail the returns on a portfolio of securities which include such companies. A portfolio's ESG criteria may result in the portfolio investing in industry sectors or securities which underperform the market as a whole.

R-Factor™ Profile

Within each industry group, issuers are classified into five distinct ESG performance groups based on which percentile their R-Factor™ scores fall into. A company is classified in one of the five ESG performance classes (Laggard - 10% of universe, Underperformer - 20% of universe, Average Performer - 40% of universe, Outperformer - 20% of universe or Leader - 10% of universe) by comparing the company's R-Factor™ score against a band. R-Factor™ scores are normally distributed using normalized ratings on a 0-100 rating scale.

Discrepancy between the number of holdings in the R-Factor™ Summary versus the number of holdings in the regular reporting package may arise as the R-Factor™ Summary is counted based on number of issuers rather than number of holdings in the portfolio.

Green Revenue %: Percentage of revenues from green or low-carbon technology products/business, as classified by FTSE LCE system

Brown Revenue %: Percentage of revenues from "brown" sectors, extractive sectors as classified by S&P Trucost

TCFD Weighted Average Carbon Intensity - Portfolio's exposure to carbon-intensive companies, expressed in tonnes CO2e / \$M revenue. Scope 1 and Scope 2 GHG emissions are allocated based on portfolio weights (the current value of the investment relative to the current portfolio value).

TCFD Total Carbon Emissions - The absolute greenhouse gas emissions associated with a portfolio, expressed in tonnes CO2e. Scope 1 and Scope 2 GHG emissions are allocated to investors based on an equity ownership approach.

TCFD Carbon Footprint - Total carbon emissions for a portfolio normalized by the market value of the portfolio, expressed in tonnes CO2e / \$M invested. Scope 1 and Scope 2 GHG emissions are allocated to investors based on an equity ownership approach.

TCFD Carbon Intensity - Volume of carbon emissions per million dollars of revenue (carbon efficiency of a portfolio), expressed in tonnes CO2e / \$M revenue. Scope 1 and Scope 2 GHG emissions are allocated to investors based on an equity ownership approach.

Gender Diversity

We are currently using FactSet's own "People" dataset to disclose the number of women on the board, for each company in the Fund's portfolio.

Data and metrics have been sourced as follows from the following contributors as of the date of this report, and are subject to their disclosures below. All other data has been sourced by SSGA.
