

Fund Objective

The investment objective of the Fund is to seek to provide a leveraged duration exposure similar to that of a fixed real rate zero coupon swap adjusted by the UK Retail Price Index (a measure of inflation published monthly by the Office for National Statistics, the recognized national statistical institute of the UK, which measures the change in the cost of a basket of retail goods and services (the "UK RPI")) maturing on the 30th June 2035.

Investment Policy

The Fund seeks to achieve its investment objective by entering into derivative transactions including but not limited to Interest Rates Swaps ("IRS") and Inflation Swaps ("IS") (together the "Swaps") and by investing in transferable securities such as fixed income and money market instruments as well as collective investment schemes that qualify as UCITS or otherwise.

Net Returns

	1 Month (%)	3 Months (%)	1 Year (%)	3 Years (% p.a.)	5 Years (% p.a.)	Since Inception (% p.a.)
Fund	-4.55	-6.30	4.89	7.68	7.81	12.03
Benchmark	-4.15	-6.81	5.09	8.18	8.12	12.14
Difference	-0.40	0.52	-0.20	-0.50	-0.31	-0.12

Please note that this Fund underwent a benchmark change, effective 31 January 2017. The Fund was previously measured against the Barclays SSGA LDI Leveraged UK Real Rate Swap 2035 Index. Current and historic Fund returns are now measured against an OIS discounted benchmark, which is Sonia-based rather than Libor-based. Further details can be obtained upon request.

The performance figures contained herein are provided on a gross and net of fees basis. Gross of fees do not reflect the deduction of advisory or other fees which could reduce the return.

Index returns reflect capital gains and losses, income, and the reinvestment of dividends.

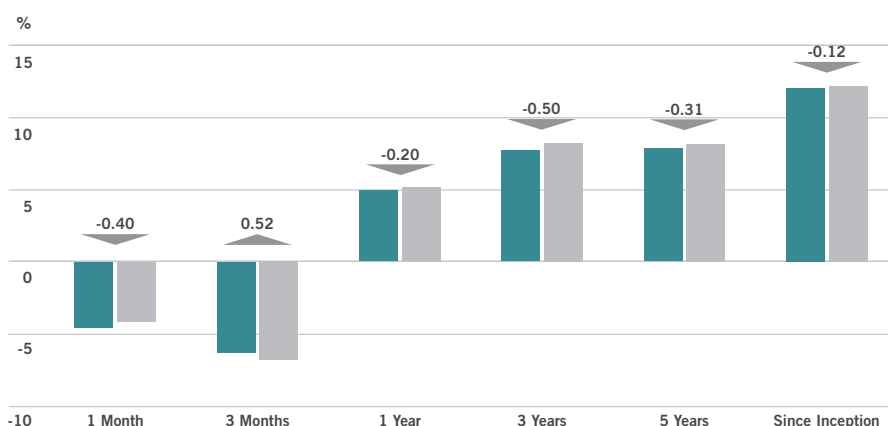

The performance includes the reinvestment of dividends and other corporate earnings and is calculated in the currency stated in the Fund Facts.

Past performance is not a guarantee of future results.

Please note that historical performance figures were presented on a Net of fees basis and were incorrectly labeled as Gross Returns. Performance figures on the March 2018 month end factsheets have been correctly labeled and contain performance on a net of fees basis. From April 2018 month end onwards, factsheets will include both Gross and Net Returns. For further details, please contact your SSGA Relationship Manager.

Certain Risk Controls

Risk in the Fund's cash portfolio will be minimised through diversification, detailed credit analysis and the on-going monitoring of risks within the cash portfolio. Risk from the Fund's IRS positions will be minimised through detailed, on-going credit analysis of counterparties, in-depth analysis of transaction terms and through close attention to collateral exposures under the transactions.

Investing involves risk including the risk of loss of principal. Bonds generally present less short-term risk and volatility than stocks, but contain interest rate risk (as interest rates rise, bond prices usually fall); issuer default risk; issuer credit risk; liquidity risk; and inflation risk. These effects are usually pronounced for longer-term securities. Any fixed income security sold or redeemed prior to maturity may be subject to a substantial gain or loss.
