

State Street International Stock Selection Fund - Class I

Fund Objective

The State Street International Stock Selection Fund (the "Fund") seeks to provide long-term capital growth by investing primarily in securities of foreign issuers.

The Adviser employs a proprietary quantitative multi-factor stock-selection model to select securities while controlling risk exposure of the Fund relative to the Fund's benchmark.

Process

The Fund will attempt to meet its objective through the active selection of equity securities. The Fund management team will concentrate investments in holdings that are composed of, but not limited to, countries included in the Morgan Stanley Capital International Europe, Australasia, Far East (MSCI® EAFE™) Index. The Fund's Adviser employs a proprietary quantitative multi-factor stock selection model. This model is intended to reflect the risk characteristics of the Fund's benchmark, as well as determine the specific securities and quantities the Fund purchases, holds and sells. The quantitative model allows the Adviser to evaluate each eligible security and then rank eligible securities in the Fund's investment universe in the order of their attractiveness as Fund investments. The Adviser also regularly reexamines the model and may make updates and adjustments to the economic and financial conditions and other quantitative metrics considered, and to the weightings among them.

Key Features

- Team based decision making by experienced investment professionals
- Broad exposure to MSCI EAFE Index
- Diversification across countries and sectors*
- Multi-factor approach to stock selection

Not FDIC Insured. No Bank Guarantee. May Lose Value.

Risk Management

Risk can be defined in many ways. Identifying, quantifying and controlling risk are all important elements of the Funds investment strategy. Portfolio risk relative to the market is managed throughout the construction process. The Adviser regularly evaluates the fund to limit exposures to unintended risk factors.

Portfolio Guidelines

- Initial Positions are generally limited to a maximum of 2% active weight, but may grow to 3%
- Approximate average turnover 50% - 80%
- Regional exposure are neutral to benchmark
- Sector Weights: +/- 3% relative to each country/region's local benchmark

About This Benchmark

The MSCI EAFE Index is an equity index which captures large and mid cap representation across 21 Developed Markets countries around the world, excluding the US and Canada. Developed Markets countries in the index include: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland and the UK. The index covers approximately 85% of the free float adjusted market capitalization in each country.

Past performance is not a reliable indicator of future performance. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. All results are historical and assume the reinvestment of dividends and capital gains. Visit www.ssga.com for most recent month-end performance. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect capital gains and losses, income, and the reinvestment of dividends. An annualized yield that is calculated by dividing the investment income earned by the fund less expenses over the most recent 30-day period by the current maximum offering price that does not take into account expense ratio subsidizations.

Performance shown for the periods prior to the inception of Class I shares on July 7, 2014, reflect the historical performance of the fund's Class N shares including the applicable 12b-1 fees. Had the fund's Class I fees been reflected, the returns shown for those periods would have been higher.

*The Fund's investment adviser, SSGA Funds Management, Inc. (the "Adviser" or "SSGA FM"), is contractually obligated until December 31, 2024 (i) to waive up to the full amount of the advisory fee payable by the Fund, and/or (ii) to reimburse the Fund to the extent that Total Annual Fund Operating Expenses (exclusive of non-recurring account fees, extraordinary expenses, acquired fund fees and expenses, and distribution, shareholder servicing and sub-transfer agency fees) exceed 0.75% of average daily net assets on an annual basis. This waiver and/or reimbursement may not be terminated prior to December 31, 2024 except with the approval of the Fund's Board of Trustees. SSGA FM has contractually agreed to waive 0.01% of its administration fee. This waiver may not be terminated or modified except with the approval of the Fund's Board of Trustees and shall continue until at least December 31, 2024.

*Diversification does not ensure against loss.

Glossary

NAV is the market value of a mutual fund's and ETFs total assets, minus liabilities, divided by the number of shares outstanding.

Price/Earnings Ratio FY1 is the closing price divided by the sum of the forecasted fiscal year earnings per share.

Price/Book Ratio is the current market price of the stock divided by the most recently reported book value for the prior fiscal year.

Important Risk Information

Investing involves risk including the risk of loss of principal. The whole or any part of this work may not be reproduced, copied or transmitted or any of its contents disclosed to third parties without SSGA's express written consent. All information is from SSGA unless otherwise noted and has been obtained from sources believed to be reliable, but its accuracy is not guaranteed. There is no representation or warranty as to the current accuracy, reliability or completeness of, nor liability for, decisions based on such information and it should not be relied on as such. The information

provided does not constitute investment advice and it should not be relied on as such. It should not be considered a solicitation to buy or an offer to sell a security. It does not take into account any investor's particular investment objectives, strategies, tax status or investment horizon. You should consult your tax and financial advisor. The trademarks and service marks referenced herein are the property of their respective owners. Third party data providers make no warranties or representations of any kind relating to the accuracy, completeness or timeliness of the data and have no liability for damages of any kind relating to the use of such data. This communication is not intended to be an investment recommendation or investment advice and should not be relied upon as such. The Fund's investments are subject to changes in general economic conditions, general market fluctuations and the risks inherent in investment in securities markets. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, changes in the actual or perceived creditworthiness of issuers, and general market liquidity. The Fund is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, or other events could have a significant impact on the Fund and its investments.

Derivative investments may involve risks such as potential illiquidity of the markets and

additional risk of loss of principal.

These investments may have difficulty in liquidating an investment position without taking a significant discount from current market value, which can be a significant problem with certain **lightly traded securities**.

Investments in **mid-sized companies** may involve greater risks than those in larger, better known companies, but may be less volatile than investments in smaller companies.

Companies with **large market capitalizations** go in and out of favor based on market and economic conditions. Larger companies tend to be less volatile than companies with smaller market capitalizations. In exchange for this potentially lower risk, the value of the security may not rise as much as companies with smaller market capitalizations.

Foreign investments involve greater risks than U.S. investments, including political and economic risks and the risk of currency fluctuations, all of which may be magnified in **emerging markets**.

Equity securities may fluctuate in value and can decline significantly in response to the activities of individual companies and general market and economic conditions.
