

# SPDR MSCI Japan Climate Paris Aligned UCITS ETF

## Hållbarhetsrelaterade upplysningar för webbplats för en artikel 8-fond

### A. Sammanfattning

SPDR MSCI Japan Climate Paris Aligned UCITS ETF ("fonden") är en indexfond som följer utvecklingen hos MSCI Japan Climate Paris Aligned Index. Indexet har utformats i syfte att uppnå de miljörelaterade och sociala egenskaper som främjas av fonden. De miljörelaterade och sociala egenskaper som främjas av fonden är indexet som har utsetts av fonden. Indexet har som mål att spegla resultatet hos en underkategori av aktierelaterade värdepapper i bolag som ingår i MSCI Japan Index ("moderindexet"), för att minska exponeringen mot omställningsrisker och fysiska klimatrisker samtidigt som möjligheter som uppstår vid övergången till en lågkolekonomi utnyttjas och fondens portfölj inrättas efter Parisavtalet, som antogs enligt kraven i Förenta nationernas ramkonvention om klimatförändring ("Parisavtalet").

Fonden främjar miljörelaterade och sociala egenskaper men har inte hållbara investeringar som mål.

De miljörelaterade och sociala egenskaper som främjas av fonden är indexet som har utsetts av fonden. Indexet har som mål att spegla resultatet hos en underkategori av aktierelaterade värdepapper i bolag som ingår i MSCI Japan Index ("moderindexet"), för att minska exponeringen mot omställningsrisker och fysiska klimatrisker samtidigt som möjligheter som uppstår vid övergången till en lågkolekonomi utnyttjas och fondens portfölj inrättas efter Parisavtalet, som antogs enligt kraven i Förenta nationernas ramkonvention om klimatförändring ("Parisavtalet"). Indexet utesluter likaså vissa bolag utifrån deras inblandning i följande kontroversiella affärsverksamheter: kontroversiella vapen, tobak, olja och gas, utvinning av termiskt kol och kraftgenerering. Indexleverantörens definition av "involvering" beskrivs mer utförligt i indexmetoden. Indexet utesluter dessutom bolag som indexleverantören har identifierat som inblandade i kontroverser som har negativ ESG-påverkan på deras verksamhet och/eller produkter och tjänster baserat på ett betyg från MSCI som mäter ESG-kontroverser ("MSCI ESG Controversy Score").

Investeringsförvaltaren och/eller den externa investeringsförvaltaren kommer, på fondens vägnar, att investera med hjälp av en replikeringsstrategi enligt beskrivningen i avsnittet "Investment Objectives and Policies – Index Tracking Funds" i informationsbroschyren, främst i värdepapper som ingår i indexet och under alla omständigheter i enlighet med de investeringsbegränsningar som redogörs för i informationsbroschyren.

Förvaltaren tillämpar en bindande ESG-metod, som syftar till att skapa en portfölj där minst 90 procent av fondens tillgångar investeras i värdepapper som är förenliga med de miljörelaterade och sociala egenskaper som främjas av fonden. Resten (<10 %) av portföljen, som består av kontanter och likvida medel som innehas enligt investeringsförvaltarens gottfinnande, kommer inte att vara förenlig med de miljörelaterade och sociala egenskaper som främjas. I den mån fonden använder

finansiella derivatinstrument kommer dessa inte att användas för att uppnå de miljörelaterade eller sociala egenskaper som främjas av fonden. Fondens åtar sig inte att göra hållbara investeringar enligt betydelsen i disclosureförordningen eller taxonomiförordningen.

Den andel av fondens portfölj som är investerad i värdepapper som ingår i indexet utgör en hållbarhetsindikator som används för att mäta uppfyllelsen av alla miljörelaterade och sociala egenskaper som främjas av fonden.

Länken till indexmetoden som tar upp de miljörelaterade och sociala egenskaper som främjas av fonden finns tillgänglig i tillämplig fondbilaga och här nedanför.

Indexmetoden innehåller en utförlig beskrivning av de datakällor som används för att fastställa de relevanta miljörelaterade och sociala egenskaperna.

Det finns en risk att indexleverantören kan göra misstag såsom felaktiga bedömningar av screeningkriterierna enligt beskrivningen i placeringsinriktningen och/eller inkluderar fel/exkluderar rätt beståndsdelar i screeningprocessen. ESG-datan kan baseras på vissa antaganden, prognoser, förutsägelser, uppfattningar och åsikter som kan bygga på aktuella marknadstrender eller förväntade framtida händelser. Med tanke på att datamodeller, metoder och antaganden är innovativa och fortfarande under utveckling och den inneboende osäkerheten kring prognoser om framtida händelser finns det inga garantier för att ESG-datan alltid är noggrann och korrekt eller att ESG-datan kommer att uppfylla syftena eller kraven hos en specifik klient eller investerare. Det kan också hända att vissa data inte kan inhämtas på grund av otillgängliga datakällor.

SSGA har tillsyn över externa leverantörer, däribland indexleverantörer, i enlighet med sitt riskhanteringsprogram för tredje man. SSGA har en löpande samverkan med indexleverantörerna med genomgång av servicenivåer och mer fokuserade granskningar av indexleverantörernas processer, system, kontrollmekanismer, data, kvalitetskontroller och IT-säkerhet.

SSGA:s riktlinjer för engagemang är inte direkt integrerade i fondens investeringsstrategi. Genom SSGA:s Asset Stewardship-program sammanförs ändå allt omröstnings- och engagemangsarbete avseende olika andelsklasser, oavsett investeringsstrategi eller territorium, inklusive för fonden.

Fonden har utsett indexet i syfte att uppnå de miljörelaterade och sociala egenskaper som främjas av fonden. Indexet ombalanseras två gånger om året, per slutet av den sista affärsdagen i maj och november.

## **B. No sustainable investment objective**

The Fund promotes environmental or social characteristics, but does not have as its objective a sustainable investment.

### C. Environmental or social characteristics of the financial product

The environmental and/or social characteristics promoted by the Fund are those promoted by the MSCI Japan Climate Paris Aligned Index (the "Index") which the Fund tracks. The Index aims to reflect the performance of a sub-set of equity securities of companies within the MSCI Japan Index (the "Parent Index"), to reduce exposure to transition and physical climate risks while pursuing opportunities arising from the transition to a lower-carbon economy and seeks to align with the Paris Agreement adopted under the United Nations Framework Convention on Climate Change requirements (the "Paris Agreement").

### D. Investment Strategy

The investment policy of the Fund is to track the performance of the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) as closely as possible, while seeking to minimise as far as possible the tracking difference between the Fund's performance and that of the Index.

The Index aims to reflect the performance of a sub-set of equity securities of companies within the Parent Index which are selected and weighted in accordance with the Index methodology. The Index methodology aims to reduce exposure to transition and physical climate risks while pursuing opportunities arising from the transition to a lower-carbon economy and seeking to align the Fund's portfolio with the Paris Agreement adopted under the Paris Agreement. The Parent Index measures the performance of large and mid-capitalisation stocks of the Japanese equity markets. The Index aims to exceed the minimum standards for EU Paris-Aligned benchmarks set out in the Commission Delegated Regulation (EU) 2020/1818 for the methodology of benchmark indices that would be aligned with the objectives of the Paris Agreement. The Index excludes certain companies based on their involvement in the following controversial business activities: controversial weapons, tobacco, oil and gas, and thermal coal mining and power generation, with further detail on how the Index provider defines what constitutes "involvement" outlined in the Index methodology. The Index also excludes companies which are identified by the Index provider as being involved in controversies that have a negative ESG impact on their operations and/or products and services based on an MSCI ESG controversy score ("MSCI ESG Controversy Score").

The Investment Manager and/or Sub-Investment Manager, on behalf of the Fund, will invest using the replication strategy as further described in the "Investment Objectives and Policies – Index Tracking Funds" section of the Prospectus, primarily in the securities of the Index, at all times in accordance with the Investment Restrictions set forth in the Prospectus.

Companies deemed not in violation by the Index provider of the UNGC principles are considered to exhibit good governance. For information on the methodologies used in the construction of the Index and further information on the exclusion criteria and data sources, please refer to MSCI's index methodology description which can be found at the following link:  
[https://www.msci.com/eqb/methodology/meth\\_docs/MSCI\\_Climate\\_Paris\\_Aligned\\_Indexes.pdf](https://www.msci.com/eqb/methodology/meth_docs/MSCI_Climate_Paris_Aligned_Indexes.pdf)

## E. Proportion of investments

Environmental and social characteristics are promoted via the adoption of screens and best in class criteria within the Index .

At least 90% of the Fund's assets are invested in securities that are constituents of the Index and aligned with environmental and / or social characteristics, while the Index provider applies ESG ratings on all the Index constituents. The Fund does not commit to making sustainable investments within the meaning of the SFDR or the Taxonomy Regulation. The Fund may hold 10% of its assets in cash or cash equivalents and derivatives used for currency hedging and efficient portfolio management purposes, at the Investment Manager's discretion. Such assets will not be aligned with environmental and social characteristics, nor will there be any environmental or social safeguards in place.

The Fund does not commit to making sustainable investments within the meaning of the SFDR or the EU Taxonomy Regulation.

The portfolio of the Fund is predominantly composed of securities that comply with the ESG standards outlined above and in the index methodology (and in ensuring that the portfolio is exempt of issuers having activities that would significantly harm this objective).

## F. Monitoring of environmental or social characteristics

Attainment of the relevant characteristics is evaluated using the indicators described below. The Index aims are:

- A reduction of overall greenhouse gas (GHG) intensity compared with the Parent Index;
- A minimum decarbonisation rate of GHG intensity reduction per year
- Exposure to sectors with a high impact on climate change at least equivalent to the Parent Index to align with the objectives of the Paris Agreement to include exposure to sectors that should actively reduce GHG emissions.

The index takes into account:

- Increased exposure to companies that publish emissions reduction targets, publish their annual emissions and reduce their GHG intensity;
- Contribution to reduced weighted average potential emissions intensity compared with the Parent Index;
- Contribution to increased overall low carbon transition (LCT) score compared with the Parent Index (i.e., lower overall exposure to companies facing risks from LCT and / or higher overall exposure to companies which may have opportunities from LCT), as determined by the index provider;
- Reduction in exposure to physical risk arising from extreme weather events compared with the Parent Index
- Contribution to increased overall exposure to companies with a minimum green-to-brown revenue ratio compared with the Parent Index with green revenues being those which reflect company revenues from products and services that have the potential to contribute to the low carbon transition versus brown revenues which have the potential to harm the environment and worsen the low carbon transition (for further information on the meaning of green and brown revenue and how they are calculated please refer to the index methodology);
- Contribution to increased overall green revenue compared with the Parent Index; and
- Constituent-level liquidity and diversification caps.

The Fund rebalances on a semi-annual basis, in line with the Index rebalancing frequency.

## G. Methodologies

The index methodology which captures the environmental or social characteristics promoted by the financial product is made available in the fund supplement.

## H. Data sources and processing

The data sources used to attain the relevant environmental or social characteristics are detailed in the index methodology.

## I. Limitations to methodologies and data

There is a risk that the index provider may make errors, such as incorrect assessment of the screen criteria described in the Investment Policy and/or include incorrect/exclude correct constituents in the screening process. ESG scoring and screening is subject to inherent methodological limits. Any assessment of ESG criteria by an Index is based on the data provided by third parties. Such assessments are dependent upon information and data that may be incomplete, inaccurate or unavailable, which could cause incorrect assessment of an issuer's ESG performance. In particular there may be potential inconsistencies, inaccuracy or a lack of availability of required ESG data, particularly where this is issued by external data providers. These limitations may include but are not limited to issues relating to: - Missing or incomplete data from companies (for example, relating to their capacity to manage their Sustainability Risks) which have been used as input for any scoring model; - The quantity and quality of ESG data to be processed; and - The identification of relevant factors for the ESG analysis.

ESG data may be based on certain assumptions, forecasts, projections, views and opinions which may be based on current market trends or anticipated future events. To assess company involvement in different activities and to estimate revenue shares as accurately as possible, data

providers strive to obtain information directly from companies and issuers. Sources of data include annual reports, regulatory filings, sustainability reports, press releases, investor presentations, company websites, and other company disclosures. Given the developing and innovative nature of data models, methodologies and assumptions and the inherent uncertainty in predicting forward-looking events, it cannot be guaranteed that the ESG data is always accurate or correct or that the ESG data will satisfy the aims or requirements of any specific client or investor. Furthermore, there may be data that cannot be sourced due to the lack of availability of data sources.

## J. Due diligence

SSGA oversees external vendors, including index providers, in line with its third party risk management programme. SSGA engages with index providers regularly for service level reviews and also undertakes targeted reviews of index providers' processes, systems & systems controls, data, quality controls & IT security.

## K. Engagement policies

**Is engagement part of the environmental or social investment strategy?**

Yes

No

While SSGA engagement policies are not directly embedded into the Fund's investment strategy, for SSGA the informed exercise of voting rights coupled with targeted and value-driven engagement is the most effective mechanism of creating value and managing Sustainability Risk for the investors. SSGA's Asset Stewardship programme consolidates all voting and engagement activities across asset classes, irrespective of investment strategy or geographic region. The engagement strategy is built on SSGA's ability to prioritise and allocate resources to companies and issues that have the greatest potential impact. SSGA's Asset Stewardship programme is underpinned by 3 separate pillars, that is, (i) providing information and guidance to investee companies on the development of ESG practices across key issues, (ii) engaging with portfolio companies to encourage transparent, accountable, high performing boards and companies, and (iii) by exercising voting rights in a manner that reflects long term investment objectives for the purpose of influencing the activity or behaviour of the issuers. To support this process, SSGA has developed proprietary in-house tools to help identify companies for active engagement based on various financial and ESG indicators.

## L. Reference benchmark

**Has a reference benchmark been designated for the purpose of attaining these characteristics promoted by the Fund?**

Yes No

The Fund is an index fund tracking the performance of the MSCI Japan Climate Paris Aligned Index. The Index has been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund. The Index aims to reflect the performance of a sub-set of equity securities of companies within the MSCI Japan Index (the "Parent Index"), to reduce exposure to transition and physical climate risks while pursuing opportunities arising from the transition to a lower-carbon economy and seeks to align with the Paris Agreement adopted under the United Nations Framework Convention on Climate Change requirements (the "Paris Agreement").

The Index is rebalanced on a semi-annual basis, as of the close of the last business day of May and November.
